Pre-Deluvian Civilizations

Advanced technology, language, writing, cities

Post-Deluvian Civilizations: Humanity migrates, explores the globe, recovering technology

Lost Civilizations

Wars and changing climate cause a loss of knowledge and dark ages

The Creation Week - Order of Events

Day One

- 1. Watery, formless planet Earth suspended in the darkness and void of space (no stars, no sun, no moon, no planets - except for Earth).
2. Light.
3. Separation of light from the darkness - and the first indication that the planet is rotating (day and night cycle produced).

Origin of the UNIVERSE *see Plasma Theory

Day Two

- 4. Formation of Earth's atmosphere, separating the water into two parts: (a) oceanic and subterranean water (b) atmospheric water.

Day Three

- 5. Dry land and oceans.
6. System to water the entire land surface using subterranean waters (involving springs or mist, or both).
7. Vegetation, seed-bearing plants, trees that bear fruit.
8. Garden of Eden (probably).

Day Four

- 9. Sun
10. Moon - complete with established orbit so as to mark passage of time (months, seasons, and years).
11. Stars and other planets.

Day Five

- 12. Water creatures of all kinds. (All that had "the breath of life" were vegetarian).

Day Six

- 14. Land animals (all vegetarian): (a) creatures that move close to the ground (small animals), (b) large animals, and (c) animals of use to man as livestock.
15. Man.
16. Woman (saving the best for last?).

Tower of Babel Cataclysm
"Division" Cataclysm
Noah Flood Cataclysm Event

* Job - Jobab Son of Joktan brother of Peleg

Contents settling, ice caps melting causing the waters to rise, local flooding- cities, separating landforms, continued plate movement, volcanoes, earthquakes*, windstorms*, tsunamis comet / meteor impacts

*Grand Canyon formation
* Languages confused, continued dispersion of humanity. Possible scientific cause: Earth entering plasma tail of Venus*

*The "fountains of the deep" break open, initiating plate movement, jettisoning water/ice and rock into space -Comets & asteroids, Mammoths etc. freeze, oceans warm -Ice age, continents crash together -Mountains uplift, much fossilisation via liquifaction, limestone & sediments.
